J&S Analytics LLC

Capability Statement

UEI No. VKCCQUCZ71C6 | CAGE 20X99

EXECUTIVE SUMMARY

J&S Analytics LLC is a Virginia-based technology consulting firm delivering Artificial Intelligence, Data Engineering, Cloud Engineering, and Enterprise Modernization solutions to government and commercial organizations. We help organizations modernize legacy systems, automate business processes, and transform complex data into actionable intelligence. Our team combines public-sector modernization experience with practical, security-conscious delivery across architecture, development, deployment, and operations.

CORE COMPETENTIES

Data Engineering

- ETL | ELT Development
- Data Quality
- SQL & Database Development
- Data Pipelines
- Data Integration
- Data Warehousing

Artificial Intelligence

- AI Strategy & Roadmaps
- AI | ML | GenAI Solutions
- Retrieval-Augmented Generation (RAG)
- Agentic Workflow & Automation
- NLP & Document Intelligence
- Responsible | Secure AI Solution

Enterprise Solutions

- Enterprise Architecture
- Application Modernization
- API Development & Integration
- Business Process Automation
- Solution Architecture & Roadmaps
- System Modernization

Enterprise Solutions

- AWS | Azure | Hybrid Cloud
- Cloud Architecture
- Containerization
- CI/CD & Infrastructure Automation
- DevSecOps Best Practices
- Cloud Migration

DIFFERENTIATORS

MISSION-FOCUSED

Solutions aligned with mission objectives, operational priorities, and measurable outcomes for government and regulated organizations.

PRACTICAL & AGILE

Right-sized solutions delivered through an agile, collaborative approach that balances innovation with real-world implementation.

TRUSTED & SECURE

Security and governance integrated throughout the solution lifecycle to support scalable, compliant, and reliable AI adoption

EXPERIENCED

Hands-on expertise delivering enterprise AI, cloud modernization, data engineering, and intelligent automation solutions.

CUSTOMER-FIRST

A collaborative delivery approach focused on transparency, responsiveness, and long-term customer success.

KEY EXPERIENCE

Cloud & Data Modernization

Supporting secure, scalable, and mission-critical modernization through cloud-native solutions, large- scale data engineering, and system integration.

Enterprise AI Solutions

Designing production-ready AI solution architecture, intelligent document processing, information management, and workflow automation.

Responsible & Trusted Delivery

Embedding governance, security, explainability, and human oversight to enable transparent, compliant, and trustworthy AI adoption.
